About the cover: Hachimi-jio-gan, a Kampo formulation, is composed of crude extracts of eight herbal plants. The three-dimensional HPLC analysis, the so-called 'fingerprint' method, was performed to assess the homogeneity of the formulation and to prepare batches of constant formulation. SELDI-TOF-MS using ProteinChip platform shows proteomic patterns of plasma proteins in spontaneous diabetic rats with nephropathy after oral administration of the above described Hachimi-jio-gan. See the article by Kiga *et al.* on page 1031 of this issue.
